## Introduction

There is only one chance to make a good first impression and this is precisely why Bauporte designs, manufactures, installs and maintains impressive entrances for her clients.

Bauporte is a supplier of extreme high-quality, custom-made design entrances. Bauporte designs grand entrances for clients in Europe and beyond. Our products include manual and automatic revolving doors, tall revolving doors, automatic sliding doors, automatic curved sliding doors, automatic swing doors, inclined automatic doors, fire resistant doors, security doors, entrance screens, and all forms of glazing.

# Bauporte's History

Bauporte was founded in 1992 and in 1999 took over Grothkarst, a German company that had been developing and constructing high-quality doors since 1908. Bauporte was born when Karel E. Bouman, its current owner and director, who has a wealth of experience in the door and entrance industry, correctly spotted a gap in the market for bespoke doors.

NOTHING IS MORE ELEGANT THAN AN ATTRACTIVE ENTRANCE

## Enhance your Grandeur with Bauporte

Increasingly sophisticated end-users demanded higher quality and innovation standards for their buildings, seeking unique, customized aesthetic and functional solutions for their entrances. Bauporte understood and relished this challenge and, shortly after its inception, the company was able to deliver outstanding services and products to Europe and beyond.

# Bauporte's Philosophy

Bauporte does not view entrance doors as just doors but sees them as splendidly designed entrances, constructed to the highest specifications and produced from ultra-modern materials. Companies across the world are immensely satisfied with Bauporte's products and services - and we are confident that you will feel the same.

20

NOTHING IS MORE ELEGANT THAN AN ATTRACTIVE ENTRANCE

## Expertise and Innovation

The company continues to expand its activities while constantly investing in expertise and innovation, providing astonishing new designs, including extremely tall, full-glass revolving doors, security doors, custom-made automatic sliding and swing doors with in-ground drive units.

Bauporte now occupies a unique position in the global entrance market and, no matter the type of entrance, Bauporte has the solution, or will develop one to suit. Bauporte's passion and perseverance enables it to rise above the competition and to overcome even the most obstinate entrance problems. Bauporte may be a relatively small company, but it certainly sets the standard that others try to follow.

## Three little, well-known words: “Yes we can” ...

They express the difference that Bauporte brings to a global market that typically offers “more of the same”. This starts with the staff. Their belief in their own abilities is crucial in this respect, together with the will to work hard for a collective purpose: to incorporate the greatest possible customer satisfaction into the design and function of entrances.

The difference is also evident in Bauporte’s clients, who are discerning and actively seek out high-quality, custom-made entrances. Our clients are enterprising individuals or organisations that wish to stand out from the crowd by creating something special and who are not willing to accept second best.

Bauporte is based on the principle “where there’s a will, there’s a way”. Creating designs, setting goals, adopting a hands-on approach and displaying determination, all these qualities are central to the beliefs of our clients, staff and organisation. These are our basic principles; essentially our whole philosophy is embodied in these three small words.

## Revolving Doors

Bauporte specializes in high-quality revolving doors. Every door is custom-made from the very best materials. Extreme heights and diameters are no problem.

Each door is completely custom-made from the best materials and meets the highest standards. We are constantly breaking new ground by applying larger dimensions in glass and/or using new material compositions and functions. Our doors are manually operated, service-assisted, fully automatic or work with an access control system. The same applies to options such as night shutter doors and emergency escapes: everything is assembled and functions the way you want!

### **Design Beyond the Purely Functional**

Their stainless steel base construction gives Bauporte Revolving Doors an extremely solid base and an extremely long lifespan. Bauporte's bespoke outlook on design ensures that our solutions are always individual. Our designers work with clients and architects to create a unique solution that matches and even goes beyond the needs of a building.

## Circular and Royal Prestige

Energy efficient two-, three-, or four-wing high-capacity revolving doors that can be customized to suit any design or function.

THE BAUPORTE VISION

### Energy efficient Revolving Doors that can be Customised to Suit any Design

Prestige revolving doors have a more conventional construction, with either glazed or solid curved drum walls and a solid canopy. They were designed to give access to large volumes of people and meet burglary resistance class RC2 or RC3 according to EN 1627 and PAS 24. Automatic versions are equipped with advanced protective devices such as safety sensors to secure safe use of the revolving door.

#### Some options:

- Manual or automatic operated collapsible door wings for emergency exit.
- Hot air curtain
- Glass roof in canopy
- LED lighting
- Matting
- Waterdrainage system
- Ethernet network interface

## Circular and Royal Full Vision

These all-glass two-, three- or four-wing revolving doors with a minimum of frames have been developed to create stable, uniquely special entrances. The glass we use comes from the best manufacturers. They provide transparency and crystal clear vision and fit in with modern eye-catching glass facades. Sustainable and 100% recyclable.

THE BAUPORTE VISION

## All-glass, bespoke Revolving Doors for an Impressive Entrance with timeless Design

Latest developments, such as the special, almost invisible NSWA or NSWM night security wall, shows that we meet burglary resistance class RC2 or RC3 according to EN 1627 and PAS 24, and also provide excellent airtight closure. For automatic versions the drives can be placed either in a motor pit in the floor or attached to the ceiling in the basement below.

### Some options:

- A special patented in-ground hot air curtain solution installed in the floor along the curved drum walls guarantees a comfortable draft-free entrance.
- Collapsible door wings for emergency exit purposes.
- LED lighting
- Matting
- Waterdrainage system
- Ethernet network interface

# Tall Revolving Doors

Stately and unique, tall revolving doors, specially developed by Bauporte. These doors fit buildings that are designed almost exclusively by world-famous architects.

THE BAUPORTE VISION

## Stately, unique, Tall Revolving Doors

Bauporte is able to supply doors with extreme dimensions, heights and diameters and with custom-made details. The highest revolving door produced so far has a height of 9,5 meter, with automatic collapsible doorleaves. The aesthetic design and function are determine in full consultation with the architect and/or client. With Bauporte, many architects have broken the trend and created eye-catching entrances. With tall doors, Bauporte always spins it the right way!

### Some options:

- Manual or automatic operated collapsible door wings for emergency exit.
- A special patented in-ground hot air curtain solution installed in the floor along the curved drum walls guarantees a comfortable draft-free entrance.
- Manual or automatic night shutter doors.
- LED lighting
- Matting
- Waterdrainage system
- Ethernet network interface

## Circular and Royal Nostalgia

Characteristic two-, three- or four-wing revolving doors. Revolving doors made of wood, brass, copper or bronze elements, giving the entrance an original and nostalgic performance and feeling.

THE BAUPORTE VISION

## Classical Antique-style Revolving Doors with Metal or Wooden finishing

Bauporte can produce exact replicas of revolving doors with the advantages of modern technology, automation and safety.

### Some features:

- Decorative copper coating
- Facet cut glass

## Automatic Doors

Special stainless steel automatic doors give entrance halls real grandeur. Bauporte's custom-made entrance doors are available in extreme heights up to 6,5 meter and widths up to 12,8 meter. Remarkable custom-made designs, including the Elegance, Full Vision, Eliminate and Tall versions. Bauporte creates sliding doors, curved sliding doors, pivot doors and swing doors. Our automatic doors are fitted with the latest security systems to meet EN 16005 and can be driven by mechanisms above the doors or sophisticated in-ground (off set) operators to realize aesthetical solutions. Bauporte can supply automatic doors that meet burglary resistance class RC2 or 3 according to EN 1627 and/ or fire resistance classifications E, EI and EW. High quality with a drive for optimum ease of use without technical difficulties is what Bauporte stands for.

### Boundary Breaking!

Recently, we raised the bar even higher with a parabolic telescopic sliding door, developed for a large shopping mall in Hong Kong. The dimensions are 12,8 meter wide and 6,5 meter high. The structure can withstand wind force 20 on the Beaufort scale (which so far has never even occurred, but this wind resistance is required for safety reasons).

## Straight Sliding Doors & Curved Sliding Doors

THE BAUPORTE VISION

### Straight Sliding Doors

Straight Sliding doors with operators installed in the ceiling above the door or incorporated in the floor below the door. Bauporte specializes in large dimensions in the following versions:

- Single-winged
- Double-winged
- Telescopic

Elegance or Full Vision design door wings are clad with stainless steel, aluminium, copper or brass. Eliminate is an all-glass transparent design. Tall designs have extreme dimensions. Bauporte developed an automatic mechanism for door wings with a weight of up to 3,000 kg.

### Curved Sliding Doors

Curved sliding doors with operators installed in the ceiling above the door or incorporated into the floor below the door. Bauporte specializes in large dimensions in the following versions:

- Single curved wing
- Double curved wings
- Telescopic curved wings
- Parabolic curved wings
- Combination of straight and curved wings

# Swing Doors

Automatic Swing doors provide simple convenient entrances with drive units installed on the header, in-ground or even attached to the ceiling of the basement below.

THE BAUPORTE VISION

## Automatic Swing Doors for easy Access

Bauporte specializes in large dimensions. Automatic swing doors come in the following versions:

- Single and double wing hinged
- Single and double wing pivoted

Elegance or Full Vision design door wings are clad with stainless steel, aluminium, copper or brass. Eliminate is an all-glass transparent design. Tall designs have extreme dimensions.

# Balance/Pivot Doors

Automatic balance doors, also known as pivoting doors, provide simple convenient access; with drive units mounted on the header, in-ground or even attached to the ceiling of the basement below. The balance door principle is ideally suited for wide entrances where severe or uneven wind loads are experienced.

THE BAUPORTE VISION

## Automatic Pivot Doors, ideal for Windy Conditions

Bauporte specializes in large dimensions. Automatic balance doors come in the following versions:

- Wings with pivot hinge in the middle
- Wings with pivot hinge at the side

Elegance or Full Vision design door wings are clad with stainless steel, aluminium, copper or brass. Eliminate is an all-glass transparent design. Tall designs have extreme dimensions.

# Security Doors

THE BAUPORTE VISION

## PiroSign® and SeqSign® Doors

Bauporte specializes in custom-made PiroSign® fire resistant doors that meet classifications E, EI and EW and comply with EN 1634, EN 13501, EN 15269 and SeqSign® high-security doors that meet burglary resistance standards PAS 24, RC2, 3 or 4 and comply with EN 1627, bulletproof doors that meet bullet resistance class FB1, 2, 3, 4, 5, 6 or 7 according to EN 1522; blast resistant doors that meet EXR 1, 2 or 3 according to EN 13123-2, if so desired tested and certified to meet the highest secure standards. The custom-made PiroSign® and SeqSign® safety-by-design doors provide safety according to your requirements.

- PiroSign® Revolving Doors
- PiroSign® Automatic Doors
- SeqSign® Revolving Doors
- SeqSign® Automatic Doors

## Safety by design

Security doors with extremely high protection and performance levels protect people and safeguard buildings against penetration and violence. Datacentres, government buildings, law courts, tribunals the Interagency Security Committee, building regulations (e.g. the approved Document Q in the UK), and regulations to prevent acts of violence require secure band safe armoured buildings. Bauporte works together with the best suppliers in safety glass and armour materials.

## Services & Maintenance

Bauporte products meet the highest possible quality standards. Our designers and engineers provide support to the clients and architects to achieve the desired design entrance hall solution. Bauporte has an excellent maintenance and 24/7 call out service to prevent breakdowns. For all types of doors, we have both standard and customized service contracts. Retrofit and upgrade packages are available to meet new sustainability and security standards or safety regulations. Our outstanding service guarantees a long lifespan and an excellent Total Cost of Ownership (TCO).
